

BUSINESS ROADMAP

OCOS UK Cryptocurrency: Development Roadmap from 2021 to 2026 and Beyond.

2024 AND BEYOND: ENHANCEMENT AND EXPANSION

- **Q1 and beyond:**** The development team continues its efforts for the continuous development and improvement of OCOS UK technology. In addition, it aims to establish partnerships with more exchanges.
- **Q2 and beyond:**** Researching and implementing new use scenarios and functionalities for OCOS UK.
- **Q3 and beyond:**** Develop and implement expansion strategies to reach broader audiences and ensure global acceptance of OCOS UK.

2023: MARKET LAUNCH AND GROWTH

- **Q1:**** OCOS UK is officially launched. Investors and users can buy and trade the token.
- **Q2:**** Listing on more exchanges and enhancing the accessibility of the token.
- **Q3-Q4:**** Growth and expansion of the platform through feature additions, community events, and partnerships.

2022: PREPARATION AND PROMOTION FOR MARKET

- **Q1:**** The white paper for OCOS UK is written and announced to the public. The white paper explains the technical details, use cases, and value proposition of the token.
- **Q2:**** Promotional efforts begin towards cryptocurrency communities and major exchanges.
- **Q3:**** Pre-sale phase. We can conduct the initial sale of OCOS UK tokens to investors.

2021: PROJECT INITIATION AND DEVELOPMENT

- **Q3:**** Development efforts for the OCOS UK token begin. Key objectives are set, and the technology behind the token is decided upon.
- **Q4:**** Initial tests and prototype creation. During this period, a public testnet is launched.

BUSINESS PLAN

OCOS UK began token development in 2021, made technology choices and set its targets, and established a test network. In 2022, it published its white paper, introduced itself to the crypto communities, and conducted pre-sales. It officially launched in 2023, made extensive exchange listings, and the platform grew and expanded. From 2024 onwards, the technology is being continuously developed, new use cases and functions are being researched, and expansion strategies are being implemented, aiming for global acceptance.
